In 2008, The University of Queensland St Lucia campus used 425,000 kilolitres of water. Water consumption data per calendar year shows a 50% reduction in consumption from 2004 to 2008.

Water Management at UQ

Water saving initiatives

- The Property and Facilities Division (P&F) uses a Water Efficiency Management Plan to help reduce water consumption on campus.
- P&F has an ongoing retrofitting program to reduce water consumption. Kitchens are being retrofitted with water efficient taps. Bathrooms are being retrofitted with water efficient pans, showers and taps.
- P&F uses treated effluent from Fairfield Sewage Treatment Plant for irrigating ovals.
- Stormwater, directed into the large freshwater lake on campus, is used to irrigate grounds and the Great Court area.

Help conserve water

- REPORT LEAKING TAPS
  online at: wcc2@pf.uq.edu.au/wcc
  email wcc@pf.uq.edu.au
  P&F’s Works Control Centre 336 52222

- DON’T LEAVE TAPS RUNNING
- DON’T WASTE WATER
